

LeverArchMechanisms

# PRESTIGE

The new prime mechanisms by NIKO

Developed with our european steel and plastic suppliers.

- new, extra strong material with 4,1 mm wire and 0,8 mm base-plate
- user-friendly opening, due to plastic-end on lever of the mechanism

#### Advantages:

- higher stability of mechanism on account of stronger materials consequently longer life time with use of mechanism
- mechanism and compressor-bar they are both made of finest materials, ensuring nicer appearance and sheen of the item
- all plastic parts are similar colored
- by annually agreed higher volumes, color of plastic parts as per customer's wish
